

Roshni Multani

Bhopal, MP, India | +91 7869222381 | roshnimultani0103@gmail.com | LinkedIn | GitHub

Professional Summary

Full-stack engineer with hands-on experience building production-grade AI systems and LLM-powered applications. Strong expertise in designing and shipping AI agents, integrating LLM APIs (OpenAI, Anthropic), building RAG pipelines, and implementing automated workflows using modern orchestration frameworks (LangChain, n8n). Proven ability to own features end-to-end across backend, frontend, and AI layers, combining technical depth in Python and JavaScript with product sense around where AI truly adds value.

Experience

MPOnline Ltd <i>Software Development & AI Intern</i>	Bhopal, MP, India <i>May 2026 – Present</i>
- Engineering full-stack features end-to-end using .NET, React, and Next.js during a 6-month software development and AI internship at MPOne - Building a live ML-based candidate-JD matching system, translating business requirements into a working pipeline spanning data preprocessing, feature engineering, and model integration; coordinating with cross-functional engineering teams to ship the feature into production	

Projects

Banking Intent Detection Chatbot <i>NLP, Transformer Fine-Tuning</i>	2026
- Engineered an intent classification pipeline with text preprocessing and tokenization (Hugging Face), fine-tuning DistilBERT/BERT for banking-domain intent detection with top-3 predictions and confidence scores - Designed a confidence-threshold mechanism that triggers clarification prompts on low-confidence predictions, improving reliability of user-facing output - Delivered an interactive Streamlit chatbot interface for end-to-end demonstration and stakeholder walkthroughs	
ANN-Based Customer Churn Prediction System <i>Deep Learning, Classification</i>	2026
- Built a full ML pipeline (data cleaning, missing-value handling, categorical encoding, feature scaling) and trained a dense ANN for binary churn classification, benchmarked on accuracy, precision, recall, F1, and ROC-AUC - Designed a Streamlit form for customer detail input, translating model output into clear churn/not-churn predictions with probability scores for non-technical end users	
GenAI Financial Chatbot <i>LLM-Powered Analytics Platform</i>	2025
- Architected a conversational analytics system integrating LLM APIs (Claude, GPT) with structured financial datasets, translating complex data into plain-language summaries for non-technical stakeholders - Built data preprocessing pipelines (Pandas, NumPy) and prompt/caching optimization for accurate, cost-effective LLM output; Stack: Python, Flask, LLM APIs	
Lead Qualification Agent <i>Agentic Automation & ETL</i>	2026
- Designed and built an automated ETL pipeline in Python and n8n that captures, cleanses, scores, and routes B2B leads based on business and analytical rules - Integrated multiple REST APIs for multi-source data aggregation and rule-based scoring to segment and prioritize high-value prospects, directly reducing manual review effort; Stack: Python, n8n, REST APIs	

Core Competencies

AI & LLM Engineering: LLM APIs & integration (OpenAI GPT-4/3.5, Anthropic Claude), LangChain (chains, agents, LCEL), n8n automation, RAG pipelines, prompt engineering, agent frameworks, production safety & reliability metrics
Full-Stack Development: Python (Flask, FastAPI), .NET, ReactJS, Next.js, JavaScript (ES6+), TypeScript, REST API design, ETL pipelines
Data & Databases: SQL, MySQL, MongoDB, data modeling, Pandas, NumPy
Tools & Workflow: Git/GitHub, VS Code, Firebase, cloud integrations

Education

Master of Computer Applications (MCA) <i>LNCT, Bhopal</i>	Bhopal, India <i>2023 – 2025</i>
Credit-Linked Program in AI & Machine Learning <i>IIT Guwahati (Daksh Gurukul)</i>	Guwahati, India <i>Mar 2025 – Apr 2026</i>
Bachelor of Computer Applications (BCA) <i>LNCT University</i>	Bhopal, India <i>2020 – 2023</i>

Certifications

Generative AI Mastermind – Outskill	GenAI for Financial Analysis – BCG	Cloud Computing – IBM
